

# **Sets, Kits and Outfits (SKO) Process Defense Property Accountability System (DPAS) Warehousing Application**

United States Marine Corps  
Individual Issue and Unit Issue Facility  
(IIF and UIF)

Implementation Training Course

William V. Richardson Jr. and John T. Barrera

# Purpose

- To create customized sets, kits and outfits.

# Background

- There are four processes in the use of SKOs
  - SKO Catalog, Set Kit Outfit, Materiel Movement Plan, and Materiel Movement Pick.
- Kits must be serially-managed if any of the items in the kit are shelf life managed.
- Select the Complete As Is checkbox to mark a kit as partial.
- Once a bulk kit is assembled, a DW Form 01 (kit packing list) may be generated.

# Background (cont)

- You should take note of the Bulk Kit Ids and the Bulk Kit Location for partial kits in case you need to update the kit.
- The Master Stock Number can be changed to another Stock Number.
- Filters can be used to find Stock Numbers to update.
- The ability to enter a History Remark is available but not required.

# Sets, Kits and Outfits (SKO) Flow

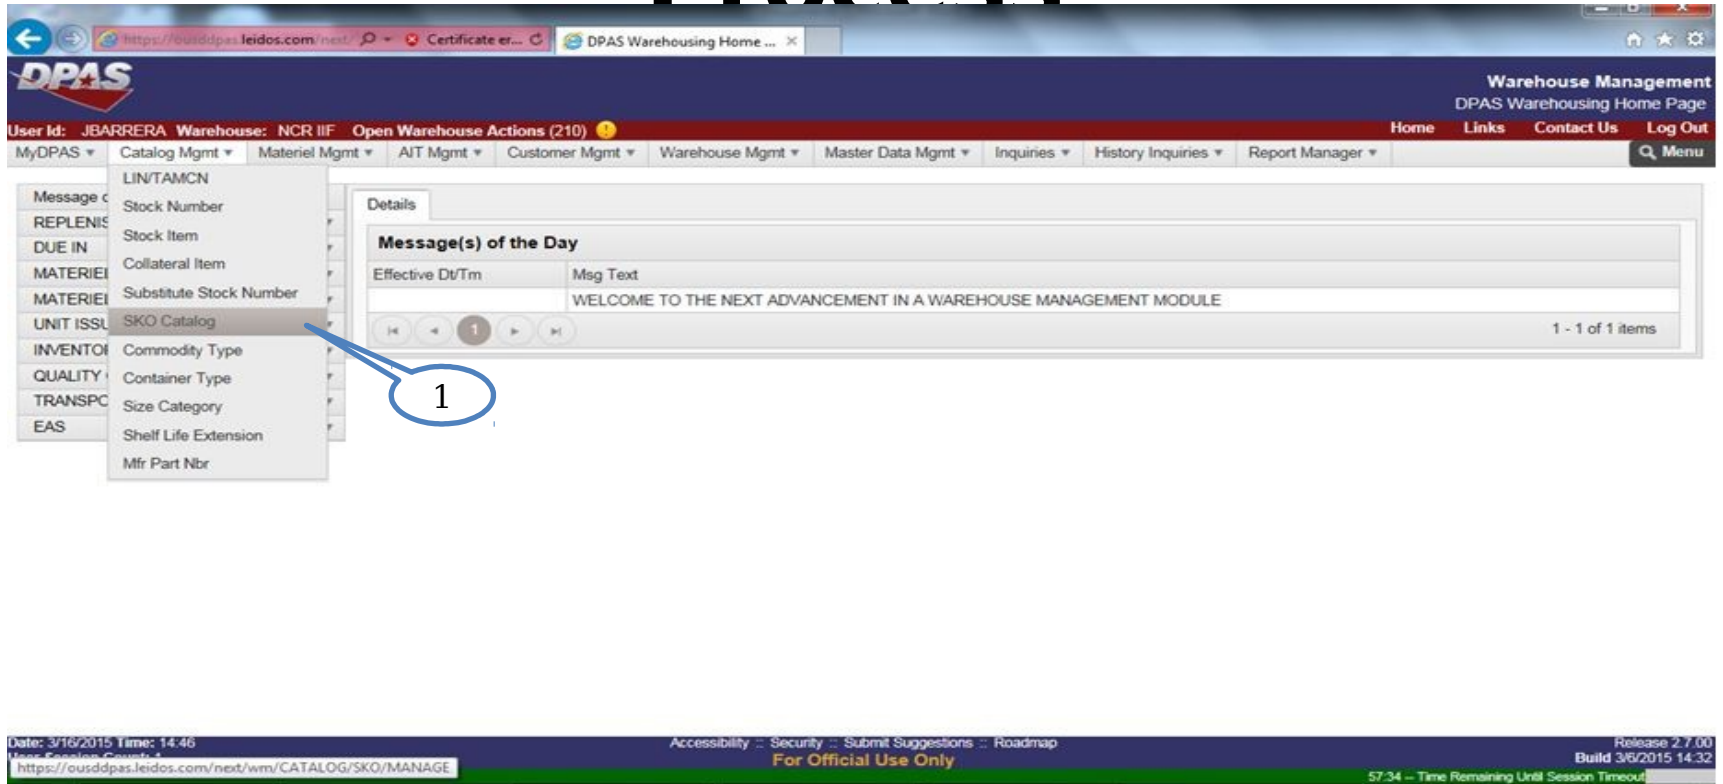

1. Defines the Master Stock Number for the SKO and defines the Item Stock Numbers for the parts which make up the assembly.
2. Identifies the items to create the kit by selecting the specific inventory. (Unmanaged)
3. Assembles the SKOs using the selected inventory. The option to send the SKOs to **Quality Control** is available. (Managed)
4. Sets the **Cost Center/Personnel** and identifies items to pick.
5. Records items which were physically moved based on the **Materiel Movement Plan**.

# Situation

You are the Region Site Coordinator. The Warehouse Officer has directed you to create a manage un-serialize outfit consisted of a 2-Part Sleeping Bag used in support of an upcoming local exercise in your area.

# Sets, Kits and Outfits (SKO) Process

Navigate to Catalog Mgmt tab.

(1) Click on the SKO Catalog option. Note: If you plan to create custom Sets, Kits and Outfits (SKOs), you will need to begin their development using the SKO Catalog process. This is where the Master Stock Number for the kit is established and the component items identified.

(2) Click on the  button.

Note: Kits must be serially-managed if any of the items in the kit are shelf life managed.

# Sets, Kits and Outfits (SKO) Process

The screenshot shows the 'Add SKO Catalog' form. It includes an 'Instructions' tab, 'SKO Information' section with fields for 'Stock Nbr' (a dropdown with a search button), 'SKO Type' (a dropdown), and several checkboxes: 'Return As Kit' (checked), 'Verify Parts Return' (unchecked), 'Verify Parts Issue' (unchecked), and 'Store Components Together' (checked). A 'Comp of Kit' checkbox is also present. Below this is the 'SKO Component List' section with a table header including 'Browse...', 'Stock Nbr', 'Item Desc', 'Stocking UI', 'Kit Managing Shelf Life Code', 'Cal/Maint/Inspect/Test At Parent Unit', 'Required Qty', and 'Display Order'. The table is currently empty. At the bottom, there are 'Add' and 'Cancel' buttons. Callouts are present: '3' points to the search button next to the 'Stock Nbr' field; 'a' points to the 'Comp of Kit' checkbox; 'b' points to the 'SKO Type' dropdown; and 'c' points to the 'Verify Parts Return' checkbox.

3

a

b

c

(3) Click on the  button to initiate a search on the stock item and select the stock number.

(a) Component of kit.

(b) Select whether the SKO will be managed and unmanaged.

(c) The Verify Parts Rqd checkboxes indicate all the parts are verified upon the return of the item.

# Sets, Kits and Outfits (SKO) Process

The screenshot shows the 'Add SKO Catalog' form. In the 'SKO Information' section, the 'Stock Nbr' field contains '846501D011541' and the 'Item Desc' is 'SLEEPING BAG 2 PART'. The '\* SKO Type' dropdown is set to 'Managed'. Checkboxes for 'Return As Kit', 'Verify Parts Return', 'Verify Parts Issue', and 'Store Components Together' are visible. A callout bubble labeled '3' points to the '+ Add' button in the 'SKO Component List' section. Another callout bubble labeled '4' points to the 'Stock Nbr' field in the 'Stock Nbr Browse' dialog box, which is open over the main form. The 'Stock Nbr Browse' dialog has search criteria for 'LINTAMCN', 'Item Desc', and 'Color', and a table of results.

Select	LINTAMCN	Stock Nbr	Item Desc	Size	Color	Reportable Commodity Type
Select	V40102F	1080001031233	CAMO, SCREEN SNOW RADAR SCATTER		WHITE	STAP
Select	V40102F	1080001031234	CAMO, SCREEN SNOW RADAR TRANSPARENT		WHITE	STAP
Select		1080001081173	SUPPORT, CAMO, SCRN SYS, WOODLAND		WOODLAND	STAP

To Add Components:

(4) Click on the  button to initiate a search on the stock item.

(5) Click on the Stock Nbr field to initiate a search component stock item.

Note: You must associate at least one Stock Number to the SKO Stock Number when adding a new SKO Catalog record.

# Sets, Kits and Outfits (SKO) Process

The screenshot displays the Warehouse Management interface with two overlapping windows. The 'Kit Assembly' window is in the foreground, showing details for Stock Nbr: 846501D011541 - SLEEPING BAG 2 PART. It includes fields for Required Qty (2), Assembled Qty (0), Full Planned Pick Qty (2), and Partial Planned Pick Qty (0). The 'Kit Assembly Location' is set to 'All'. The 'Complete As Is' checkbox is checked. The 'Location Browse' window is open in the background, showing search criteria for Facility Nbr (All), Location Id (B15B), Location Type (All), Dehumidified (All), and Outdoor (All). The search results table shows a single entry for Location Id B15B, Stock - B15B, Location Type 3 - Stock, Facility Nbr 3169, Zone Id 3169, and Status ACTIVE. Callout 4 points to the 'Complete As Is' checkbox in the Kit Assembly window. Callout 5 points to the search button in the Kit Assembly window. Callout 6 points to the selected location ID 'B15B' in the Location Browse window.
